Claims 1-9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Applicants disclose the polymer claimed in claim 1 (1) and the monomers from which it may be synthesized. However, they do not disclose how to make the polymer. That is, neither the catalyst nor experimental conditions such as solvents and temperature of reaction are disclosed. If the polymer is an item of commerce, it is unclear which of the tradenames disclosed corresponds to the claimed polymer.

No claims allowed.

The foreign patent documents, in French and German, were only considered insofar as the EPA search report provided.
